We, the undersigned,

wish to express our concern with the electronic voting systems currently under review for purchase by Boulder County. We do not feel confident that any of these systems will properly record and count our vote as we intended it. We insist Boulder County select a system in which our votes are recorded on a paper ballot, which we may verify for accuracy when we cast our vote, and which will serve as the official record of our vote. We also insist that the source code for any software used in electronic systems which are used to count our votes be available for review by any citizen.
